Telescoping Gage Sets

Another great tool for easy and accurate measurements. Under spring tension, the plungers of the gage expand from the center to the size of the hole being measured and are then locked in place using the knurled knob. Final hole size is obtained by measuring over the contacts with a micrometer or vernier caliper.

- Contact points are constructed of hardened tool steel, precision ground.
- Double action rigid handle with self-centering feature for quick checking of inside measurements
- Constant spring tension for uniform feel
- **52-470-006-0 covers a measuring range of 5/16" to 6" with measurable depths of 4" to 5"**
- **52-470-007-0 covers a measuring range of 5/16" to 6" with measurable depths of 12"**

Tool Presetter

Quick checking of heights and diameters (radius) of all kinds of tools such as ISO, BT, HSK, VDIA etc. is guaranteed by a fixed precise steel measuring column with displacement devices in coordinates (X/Z) and constant measuring force.

Tool Holding Spindle

Tool presetter is supplied with high precision imported ball cage bearing (Grade 0)
High precision spindle has:

- ISO 50 taper
- Less than 2 μ m concentricity error

Display

- MIN/MAX functions for TIR readings
- 2 reference indications for measurement comparison
- Function for PRESET value and TOLERANCE value inputs
- Tolerance mode indication for upper and lower values
- Radius or diameter indication on X-axis display
- Measuring unit (mm/inch) indication
- Low battery warning indication
- Display hold to retain readings
- Output - OPTO RS232 for each axis
- Floating zero function anywhere within axis range
- Carbide measuring insert for durability
- Accepts measuring probes with 8mm shank for unique applications

Additional Features

- Counter balanced measuring carriage
- Constant measuring force of horizontal measuring arm ensures high accuracy
- **High precision Sylvac measuring system**
